Nikodem Domaracki

Software Developer

Warsaw, Poland | nikodem.domaracki@gmail.com | domaracki.tech | linkedin.com/in/nikodemdomaracki
github.com/Nikkoro

Summary

Software developer building internal systems at DOZ, one of Poland's largest pharmacy chains. Designed and built a greenfield HR platform from scratch that replaced paper-based processes with automated workflows. Mostly C# and .NET, with TypeScript services where they fit better.

Experience

Junior C# Developer, DOZ S.A. - Warsaw, Poland July 2025 - present

- Designed and built a greenfield HR platform from scratch as a modular monolith, covering the architecture, project setup and most of the modules
- Automated paper-based HR processes, from collecting and processing data to generating documents and sending them for e-signature
- Built integrations with external services and internal systems, including e-invoicing and e-signature
- Developed internal services in TypeScript (Node.js, Bun) alongside .NET where they were a better fit, including an API gateway in front of message queues and an email template rendering service now used across other internal projects
- Used gRPC and RabbitMQ for communication between services
- Continued developing and maintaining the internal helpdesk system

C# Intern, DOZ S.A. - Warsaw, Poland July 2024 - June 2025

- Developed and maintained the internal helpdesk system in C# and .NET
- Integrated the helpdesk system with Microsoft Teams
- Refactored a legacy service that archives and processes e-prescription data from pharmacies for the analytics team

Education

Adam Mickiewicz University, Poznań, BEng in Computer Science 2019 - 2023

Skills

Languages: C#, TypeScript, SQL

Backend: .NET, ASP.NET Core, Entity Framework Core, Blazor

Data and communication: SQL Server, MongoDB, Elasticsearch, RabbitMQ, gRPC

DevOps and observability: Docker, OpenShift, GitLab CI/CD, OpenTelemetry, Elastic APM

Spoken languages: Polish (native), English (fluent)
